Professional Summary

Experienced software engineer specializing in web development across the JavaScript ecosystem, with hands-on expertise in front-end and back-end engineering. Strong background in digital banking and fintech, building secure, scalable, and user-focused solutions where reliability, performance, and user experience are critical. Driven by continuous growth, creative problem-solving, rapid learning, persistence, and effective collaboration across teams and stakeholders.

Experience

Krom Bank, Senior Full-Stack Engineer

Jakarta, Indonesia
Jan 2023 - Present

- Built and maintained full-stack internal fintech platforms using React, Next.js, Node.js, Express, TypeScript, MySQL, Sequelize, Redis, and Mantine UI.
- Owned end-to-end delivery for internal operations tools, including data modeling, UI workflows, frontend and backend implementation, monitoring, and integrations.
- Designed secure access-management workflows covering role-based access control, auditability, and access review.
- Built reusable logging and feature-flag helpers, improving integration consistency and safer rollout across internal applications.
- Improved operational reliability through monitoring dashboards, error tracing, CI/CD fixes, and infrastructure migration support.
- Reduced average execution time by 37% by refactoring legacy modules, improving code structure, and optimizing slow APIs with caching.
- Authored RFCs and technical documentation for shared engineering workflows, approval workflows, API practices, and onboarding used by multiple teams.
- Won an internal AI innovation event and presented Spec Driven Development practices to engineering teams.

PT Bank BTPN Tbk (Jenius), Back End Engineer

Jakarta, Indonesia
Dec 2019 - Jan 2022

- Built and maintained backend services for Jenius and Flexi Cash using Node.js, Express.js, GraphQL, MongoDB, Redis, and Kafka.
- Contributed backend services to Flexi Cash, a digital lending product that grew its user base by 147% over 3 years.
- Developed APIs, data flows, and service integrations for loan application, funding, and lending-related business processes.
- Supported partner integration flows with external retail partners for digital lending distribution.
- Improved backend reliability, maintainability, and troubleshooting practices across lending-related services.

- Customized Microsoft Dynamics AX ERP workflows for enterprise clients, including JNE and Gramedia.
- Translated business requirements into ERP customizations, integrations, and operational fixes.
- Built and supported integrations across data warehouse, enterprise portal, and POS printer-related systems.
- Trained professionals from multiple companies in Dynamics AX customization and implementation practices.

BINUS University, Teaching Assistant, Software Laboratory Center

Jakarta, Indonesia
Feb 2011 - Jul 2013

- Taught programming fundamentals, debugging, and project implementation to hundreds of students.
- Mentored students through lab activities, technical exercises, coursework, and programming problem solving.
- Recognized as a top-performing assistant and received technical and laboratory-related awards.

Education

International Thai-German Engineering Study Program

TGGS, KMUTNB
RWTH Aachen University

Aug 2013 - Nov 2015
Bangkok, Thailand
Aachen, Germany

BINUS University, BSc in Computer Science

Jakarta, Indonesia
Mar 2011 - Jun 2013

Courses

Advanced Figma Training Program

Skills

Full-Stack Development: Experienced in building secure and reliable web applications across frontend and backend engineering.

Backend Development: Proficient with Node.js, Express, GraphQL, REST APIs, and backend services for fintech and lending systems.

Frontend Development: Expertise in React, Next.js, and TypeScript for maintaining and developing web applications.

Database Management: Experience with MySQL, MongoDB, Sequelize ORM, and database integrations.

Messaging and Caching: Knowledgeable in Redis and Kafka for messaging and caching solutions.

Digital Banking and Fintech Platforms: Specialized in digital banking, fintech workflows, lending systems, and secure application development.

Performance Optimization: Improved system performance by 37% through application refactoring and optimization.

Security and Access Control: Experience with role-based access control and secure workflows for security-sensitive fintech operations.

Technical Consulting and ERP Customization: Provided ERP workflow customization and technical consultancy for enterprise clients including JNE and Gramedia.

Teaching and Mentoring: Experienced in teaching programming fundamentals, debugging, and mentoring university students.

Languages

Indonesian (Native speaker), **English** (Good working knowledge)

Achievements

- Awarded a DAAD scholarship for the TGGS/KMUTNB and RWTH Aachen University international engineering study program.
- Won a Samsung Android hackathon championship for mobile application development.
- Recognized as a top-performing teaching assistant at BINUS University and received technical and laboratory-related awards.
