PROFESSIONAL SUMMARY

Senior full-stack engineer with 8+ years of experience building digital banking and SaaS products using TypeScript, React, Next.js, and Node.js, including lending services that handled 2M+ transactions a month at 99.98% uptime. Well-versed in distributed systems and AI-assisted development.

WORK EXPERIENCE

Krom Bank **Jan 2023 – Present**

Senior Full-Stack Engineer | May 2026 – Present *Jakarta, Indonesia*

Develop the internal tools that Krom, an Indonesian digital bank, uses to run its daily operations.

- Automated access provisioning and revocation for 8 company tools with an HRIS-driven workflow on Node.js, BullMQ, and Redis.
- Migrated the bank's audit log from self-hosted MongoDB to Amazon DocumentDB in phases. Auditors had access to the log during all phases.
- Won an internal AI engineering competition. Then trained engineering teams across Krom and Kredivo Group to build software from written specs with AI coding agents.
- Mentor two engineers and run architecture design reviews and code reviews.
  - **Key results:** Built the **HRIS workflow engine** that now manages access for **170+ employees**. It replaced a manual process and keeps an **audit record of each change**.
  - **Tech stack:** TypeScript, Node.js, Next.js, BullMQ, Redis, MySQL, Amazon DocumentDB, AWS (Bedrock, EKS), Datadog

Full-Stack Engineer | Jan 2023 – May 2026 *Jakarta, Indonesia*

- Built a new access management system for the bank on Next.js, React, and Node.js (RBAC, employee directory, audit log, access reviews). It is the single record of who can use each app.
- Designed and built the loan collections system with in-browser calling (Vonage). It replaced scattered phone, WhatsApp, and field-visit follow-ups with one owner and one call history for each loan.
- Refactored legacy modules and added Redis caching. Average API execution time decreased by 37%.
- Published a shared npm package for login, logging, and feature flags. This removed duplicate code from four production apps.
- Wrote the Git branching and release standard. 5+ engineering teams now use this standard.
  - **Key results:** Built the bank's new **loan collections system** as the **main engineer**. Collectors now track **each overdue loan in one place** and are less likely to miss a follow-up.
  - **Tech stack:** TypeScript, Next.js, React, Mantine, Node.js, Express.js, MySQL, MongoDB, Redis, Vonage, AWS (ECS), Datadog

Bank SMBC Indonesia (Jenius) **Dec 2019 – Dec 2022**

Back End Engineer *Jakarta, Indonesia*

Worked in the lending squad on Flexi Cash, the credit line of Jenius, SMBC Indonesia's digital bank.

- Built and operated the loan approval (origination) and loan payout (disbursement) services.
- Built scheduled jobs that send loan payment reminders to Flexi Cash customers before each due date.
- Refactored the legacy admin site for lending. Customer service agents use this site to find customer and loan data for Flexi Cash during calls.
- Designed Kafka-based partner APIs for retail stores that sell Flexi Cash. Each new partner connects through the same integration.
  - **Key results: Main engineer** during the rapid growth of Flexi Cash (**147%** more users). The services handled **2M+ transactions a month** at **99.98% uptime**.
  - **Tech stack:** Node.js, Express.js, GraphQL, MongoDB, Redis, Kafka

PT Iverson Technology **Dec 2017 – Dec 2019**

Technical Consultant *Jakarta, Indonesia*

Microsoft Dynamics AX ERP consultant for enterprise clients, including JNE and Gramedia.

- Customized Dynamics AX workflows and integrated the ERP with clients' data warehouse, enterprise portal, and point-of-sale systems.
- Trained 64+ client staff to customize Dynamics AX themselves.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js (App Router), Mantine, Storybook

Backend: Node.js, Express.js, NestJS, GraphQL, REST, BullMQ, Kafka, event-driven integration

Data: MySQL, MongoDB, Amazon DocumentDB, Redis

Cloud and operations: AWS (ECS, EKS, Bedrock), Kubernetes, Docker, CI/CD, Datadog

AI engineering: AWS Bedrock agents, LLM evals with Promptfoo, spec-driven development

Languages: Indonesian (native), English (professional working proficiency)

For fun: Weightlifting (120 kg deadlift PR at 60 kg bodyweight)

EDUCATION

Thai-German Graduate School of Engineering (TGGS), KMUTNB **Aug 2013 – Nov 2015**

Master of Engineering, Software Systems Engineering *Bangkok, Thailand and Aachen, Germany*

- **GPA: 3.84/4.00.** Full DAAD scholarship (German Academic Exchange Service), competitively selected across Southeast Asia.
- Spent the second year on computer vision research at RWTH Aachen University (2014–2015).

BINUS University **Mar 2011 – Jun 2013**

Bachelor of Science, Computer Science *Jakarta, Indonesia*

- Won Top Performing Assistant at the Software Laboratory Center for teaching programming.
- Won Top Research Interest Group with a two-person team for an Android app that translates Japanese.
