## Professional Summary

Seasoned software engineer specializing in full-stack web development with JavaScript/TypeScript and deep expertise in front-end and back-end engineering. Proven experience in digital banking and fintech, building secure, scalable, and user-focused solutions where reliability, performance, and user experience are critical. Driven by continuous growth, creative problem-solving, fast learning, persistence, and effective collaboration across teams and stakeholders.

## Experience

**Krom Bank** **May 2026 - Present**  
Senior Full-Stack Engineer Jakarta, Indonesia

- Lead reliability and maintainability improvements for internal platforms serving Krom Bank's business and operations teams.
- Establish engineering standards through technical documentation, reusable implementation patterns, and structured code review.
- Own platform delivery across frontend, backend, service integrations, and observability, coordinating across engineering and business stakeholders.

**Krom Bank** **January 2023 - May 2026**  
Full-Stack Engineer Jakarta, Indonesia

- Built and scaled internal platforms supporting business and operations workflows across Krom Bank, using React, Next.js, Node.js, TypeScript, MySQL, and Redis.
- Cut average API execution time by 37% through legacy module refactoring and targeted caching, improving responsiveness for daily internal operations.
- Designed Krom Bank's internal access management system, covering RBAC, access reviews, audit trails, and multi-level approval workflows to meet compliance and operational requirements.
- Built a shared internal library covering audit logging, feature flag management, and common utilities, adopted across internal applications to standardize behavior and cut duplication.
- Strengthened production reliability by building monitoring dashboards, implementing distributed tracing, and tightening CI/CD pipelines, reducing time to detect and resolve incidents.
- Authored RFCs and technical documentation covering API design standards, developer onboarding, and cross-team engineering alignment.
- Presented spec-driven development practices to the team as a framework for structuring AI-assisted engineering workflows.

**Bank SMBC Indonesia (Jenius)** **December 2019 - January 2022**  
Back End Engineer Jakarta, Indonesia

- Built and maintained backend services for Flexi Cash, a digital consumer lending product, using Node.js, Express.js, GraphQL, MongoDB, Redis, and Kafka.
- Helped scale Flexi Cash from product launch to a 147% user base increase over three years, maintaining backend reliability through rapid growth.
- Developed APIs and service integrations for loan origination, disbursement, and partner channel workflows.
- Built integration flows with retail partners to expand Flexi Cash's lending reach across external channels.

**PT Iverson Technology**

Technical Consultant

**December 2017 - December 2019**

Jakarta, Indonesia

- Customized Microsoft Dynamics AX ERP workflows for enterprise clients including JNE and Gramedia.
- Translated business requirements into ERP customizations, integrations, and reporting solutions.
- Built integrations across data warehouse, enterprise portal, and POS systems.
- Delivered Dynamics AX training to professionals across multiple companies, covering customization, implementation, and workflow design.

**BINUS University**

Teaching Assistant, Software Laboratory Center

**February 2011 - July 2013**

Jakarta, Indonesia

- Taught programming and software development courses to undergraduate students across multiple classes and lab sessions.
- Conducted code reviews and guided students through technical exercises, debugging, and project implementation.

**Technical Skills**

---

**System Design & Architecture**

Microservices Architecture, Distributed Systems, Caching Strategies, API Design, Scalability Planning.

**Core Stack**

TypeScript, JavaScript, Node.js, React, Next.js, Express, GraphQL, REST APIs.

**Infrastructure & Platform**

AWS, GCP, Kubernetes, Docker, CI/CD pipelines, Datadog, Grafana.

**Distributed Data & Messaging**

PostgreSQL, MySQL, MongoDB, Redis, Apache Kafka.

**Domain**

Digital banking, payments infrastructure, lending systems, internal operations tooling, partner API integrations.

**Education**

---

**RWTH Aachen University**

DAAD Scholarship Study Program, Information Technology

**Oct 2014 - Nov 2015**

Aachen, Germany

**King Mongkut's University of Technology North Bangkok (KMUTNB)**

DAAD Scholarship Study Program, Information Technology

**Aug 2013 - Sep 2014**

Bangkok, Thailand

**BINUS University**

Bachelor of Science, Computer Science

**Mar 2011 - Jun 2013**

Jakarta, Indonesia

**Achievements**

---

- Won an internal AI innovation event at Krom Bank.
- Awarded a DAAD scholarship for the KMUTNB and RWTH Aachen University international engineering program.
- Won a Samsung Android hackathon championship for mobile application development.
- Recognized as a top-performing teaching assistant at BINUS University and received technical and laboratory-related awards.

**Courses**

---

Advanced Figma Training Program

**Languages**

---

Indonesian (Native speaker), English (Professional working proficiency)
